Apps for education – making life easier

For over 25 years we've been developing solutions for the education sector – all designed for your world, to streamline workflow and save you time and money. Now you can send documents directly to SIMS in an instant, use an app that lets you print, grade and analyse multiple-choice tests and much more.

Annodata is one of the UK's longest standing, independent providers of Managed Services, with 29 years' experience providing document solutions. In December 2016 we were acquired by Kyocera Corporation Japan.

We work closely with the Education Sector across the UK covering schools, academies, colleges and universities and understand the unique environment and challenges faced, such as controlling costs, managing complex security requirements and wireless print.

Amongst many others, we have provided solutions for:

- The University of Westminster
- Havering Sixth Form College
- The David Ross Education Trust

In each case, we worked in collaboration to provide a tailored print solution to meet their requirements and offer the best possible fit at all times.

Our Managed Services include print hardware and software solutions such as PaperCut and SIMS.

Software for the Education Sector

PaperCut software is widely used in the Education Sector and operates by importing users from your network directory, automatically discovers printer queues and starts tracking immediately. Install wizards help you define user access rights, page costs and quotas.

PaperCut software will give you full control over your fleet of devices:

- **Control:** account, bill or charge every copy, print and scan. Also allows staff recharge
- **Manage:** copiers, printers and users from a modern web interface
- **Report:** usage and costs by page, by user, department, device and function
- **Access:** device by PIN or MiFare card
- **Enforce:** responsible usage via applied rules, limits and auto notifications

PaperCut Interface with Multi-Functional Device (MFD)

- Web Based Interface
- Powerful Reporting Options
- Environmental User Awareness
- Top Up Card System
- Customisable User Popups
- Powerful Rules & Routing

Manage Mobile and Bring Your Own Devices (BYOD)

- PaperCut's Mobile Print Release allows users to release held jobs directly from their mobile device (smartphone or tablet)
- Designed to work on any modern smartphone or tablet such as the iPhone, iPad, and Android
- Specifically supported device operating systems / browsers include:
 - iPhone iOS 5 and newer (both iPhone and iPad)
 - Android ICS and newer (Chrome recommended)
 - Other modern mobile web browsers

PaperCut's Mobile and Bring Your Own Device solutions provide print tracking and control for the following platforms:

- Apple iOS Devices – iPads, iPhones, iPods
- Android Phones, Tablets and devices running ChromeOS
- Windows 8 Phones, Surface Tablets and RT devices

Teaching Assistant

Annodata and Kyocera have developed applications that can be embedded on the device to improve working practices and streamline processes. One such application that is beneficial to the Education Sector is 'Teaching Assistant'. This enables exam papers to be scanned at the MFD and automatically marked for multi-choice exam papers.

SIMS Connector

The SIMS Connector helps schools manage and scan documents directly from the MFD into the SIMS data base including

- Student registration and reporting
- Student performance
- Personalised learning
- Exam organisation
- Timetable construction
- Cover management

Contact us today for a "no obligation" discussion with our dedicated Public Sector team and talk through how we can help you with your requirements and challenges.
